STEP UP TO "CONTEMPO 67"

Prepare today for tomorrows composition. Use Contempo
Style 1967 Spacebands by Schneider

The tremendous technical advancements of contemporary typesetting demand that modern techniques be supported by the most up-to-date tools... a demand answered by "SCHNEIDER" CONTEMPO STYLED 1967 Spacebands.

Contempo 67 by Schneider is keyed for high speeds and abnormal stress.

Note . . . the extra high cut-back and jet-like contour bottom of wedge . . . the shortening of the tips on top of wedge.

These features alone reduce breakage by 100% and provide for quicker and smoother assembling.

Note . . . the elimination of the cut-out sleeve.

The friction-free glide sleeve* with its mirror like finish, reduces metal build-up to a very minimum. The special tempered steel plus perfect rust-free hardness, retains excellent resiliency without breakage.

The results of the Contempo-Styled "SCHNEIDER" SPACEBAND are . . .

FEWER REPLACEMENTS . . .
GREATER INSURANCE AGAINST
HAIRLINES . . . LESS MAINTEN-
ANCE . . . and more than 50% new
and lasting customers over the last
year.

ECONOMIZE. Priced at a LOW
\$2.20 each—SAVES UP TO \$5 PER
SET. Another economy: precision
grinding provides complete inter-
changeability of sleeves and
wedges

*a "Schneider" process.

"HUTZLER" SPACEBAND LUBRICANT #F-11

F-11, a mixture of COLLOIDAL GRAPHITE PARTICLES and an evaporating non-flammable solvent.

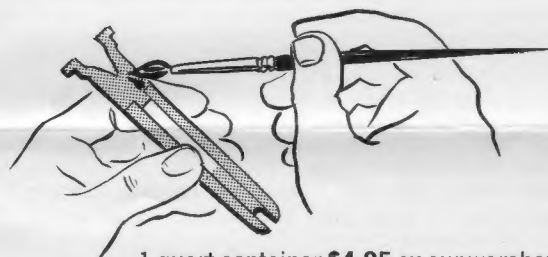

WHY IS THIS LIQUID FORM BETTER THAN DRY POWDER????

PENETRABILITY — covers all the surfaces of the band, even underneath sleeve; adheres more uniformly, thus eliminating "pancake" effect of powders.

APPLICABILITY — just dip the bands in, remove and wait TEN SECONDS. (may also be brushed on).

STABILITY — adheres longer and resists being squeezed out under pressure.

CLEANLINESS — no powdery hands, clothes, mats, machines, etc.

1 quart container \$4.95 ex our warehouse

Gallon cans quoted upon request.

F-11 assures longer spaceband life, because the casting edge is not scraped or rubbed down by pine board or with knife. Substantially reduces type metal build-up. Can be used on space mats and other parts of the machine.

HUTZLER ON THE RAIL HAIRSPACES

...

IT'S REVOLUTIONARY IT'S PATENTED HAIRSPACES For Linotypes Only

On-the-Rail Hairspaces are a major breakthrough, because they are **automatically and accurately collected**. Operators can now be released from the time-consuming chores of manually gathering and sorting.

On-the-Rail Hairspaces
offer these specific advantages:

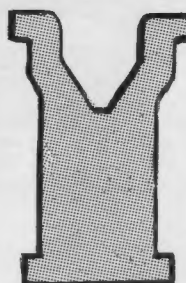

- CONSIDERABLY LESS BREAKAGE—
- GREATER LONGEVITY
- NO "PIEING"
- FAR LESS REPLACEMENTS
- A MINIMUM OF SPOILAGE—
- INCREASED PRODUCTION

Operators and cost conscious managers, will welcome the new time and dollar savings derived from this modern, patented hairspace.

IT'S NEW

Introductory price 9 cents each

Available in 1/2 pt.—.007"
1 pt.—.014"
1-1/2 pt.—.021"

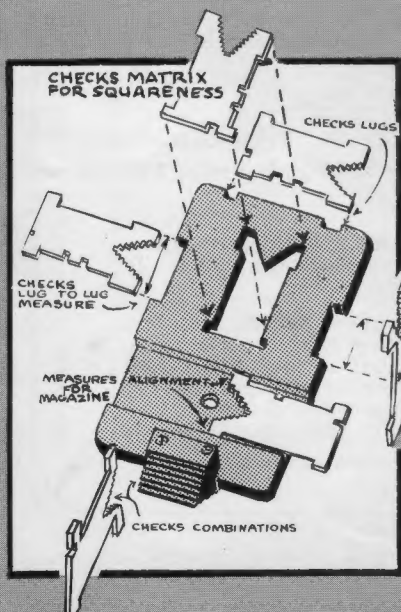

OLD STYLE

MATRIX GAUGE

A Multi-Purpose
Measuring Gauge of
hardened steel,
to insure high-quality
by sorting out
defective mats for
repair or discard.

Pocket size,
lightweight,
inexpensive.
Price \$9.50

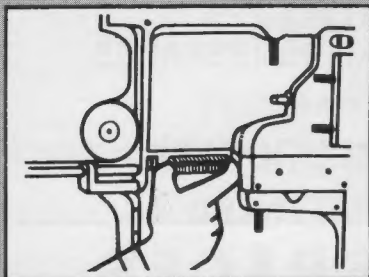

KEYBOARD BUTTONS

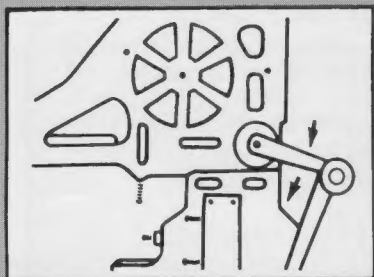

- Special material is washable and resistant to most composing room solvents.
- Moulded in modern contour shape.
- Come in three colors: Charcoal-Lt. Grey-ivory.
- Made for all styles and languages.

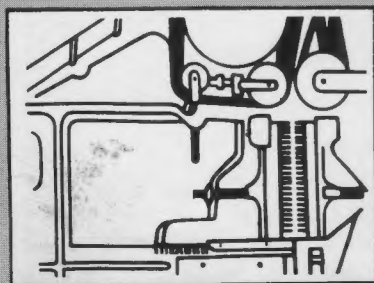

Price \$35.00 per set

MATS are placed in horizontal feed passage. Left hand pushes slide bar with mats toward **horizontal** brush chamber and elevator bar.

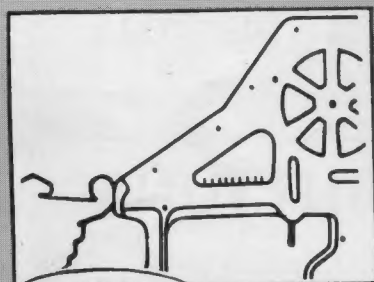

By turning the crank mats are cleaned in **vertical** brush chamber, dried and stacked automatically.

Mats go through the machine one at a time. **All** sides of mats are cleaned, yet delicate parts are touched only by soft fibre brushes and felt.

ROCLA MATRIX CLEANING MACHINE

Mats are automatically stacked in a detachable collector.

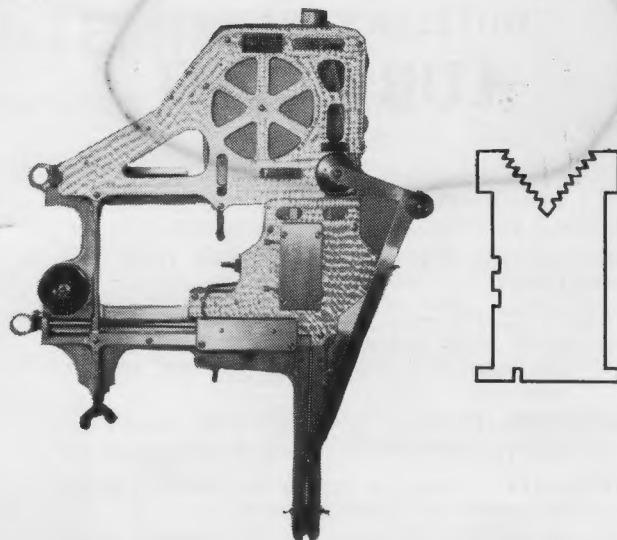

I CLEAN COMBINATIONS

I CLEAN THE REFERENCE SIDE

I CLEAN THE BOTTOM

I CLEAN LUGS & CASTING SIDE

Over 750* users will attest to the fact that the "ROCLA"

Stops . . . The Number One Cause Of Hairlines Stops . . . Gummy Mats From Sticking In Magazine

Dirt forms continuously from graphited spacebands, dust, moisture and oil from atmosphere and maintenance operations. The combination of these alien products forms hardened droplets on matrix sides, which, during casting, push in the matrix walls, causing damage and hairlines.

Clean mats will prevent hairlines and also eliminate in a great part transposition and missing letters, thus effectively combating "down time".

"Rocla" cleans **all 8 surfaces** of the matrices (including lugs and combinations) with eight soft bristle brushes and a specially formulated cleaner. Cleans off graphite, oil, dust, gum sprays, etc. on an entire font in 30 minutes.

Can triple matrix life! Figure your savings at an average of 39¢ to over \$1.00 for each mat and you see how quickly the machine pays for itself.

ALSO FOR FOTSETTER MATS:

Cleans all sides of the matrix thoroughly—gently—for longer mat life! Specially designed brushes and cleaner remove mat-damaging dirt, dust, fingerprints and other foreign matter without harming film or brass. Completely automatic cleaning, drying and stacking—just load and unload. Cleans a font of matrices in 30 minutes.

Manual model	Hot Metal	\$295.00	Fotsetter \$350.00
Motor driven model	Hot metal	\$450.00	Fotsetter \$495.00

MATRICEEN

A non-inflammable, non-acid, non-injurious liquid. Packed: 6 one-gallon cans to a carton.

Carton, \$36.
\$6.50 per gallon

FOTOCLEAN

A non-toxic, anti-static, non-damaging cleaner, chemically formulated especially for use on Foto mats. Packed: 6 one-gallon cans to carton.

CARTON, \$30.

NOW AVAILABLE: A "Converto-Kit" to convert your old-style "Rocla" to motor drive.

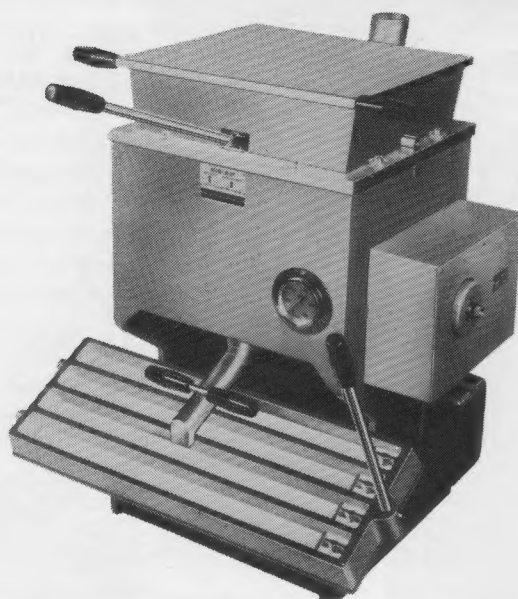

In just about 10 minutes you change from hand to motor drive. Kit contains all parts and motor, plus safety device to prevent matrix damage in case of mishap.

Price \$89.50

*names of users upon request

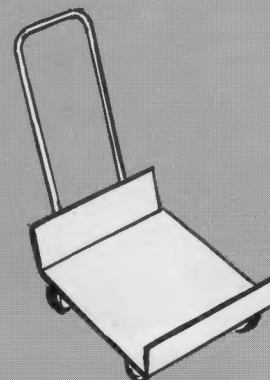

"HUTZLER"

34"

**Model HI-2-3****Complete with:****Agitator****Thermostat****Thermometer****Control Light****Water-cooled Mould**

36"

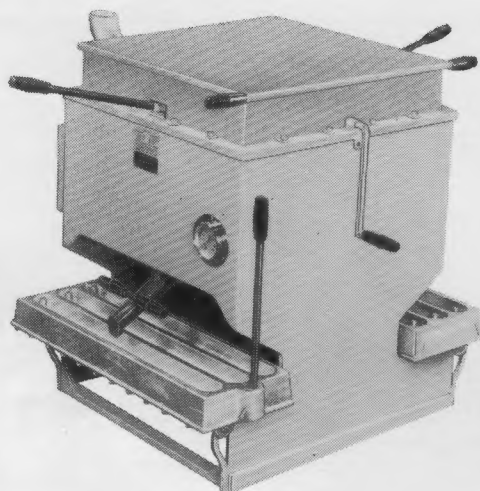

The "HUTZLER" REMELTING FURNACE is the only complete melting system because it has built-in water-cooled moulds, metal agitator, thermostat, thermometer, control light, and non-clog spout. Contemporary construction and insulation materials provide large melting capacities in very compact crucibles, thus providing extremely low loading heights (hip heights), which in turn eliminate bulky loading devices. A tight-fitting cover MINIMIZES dross and oxidation.

METAL PIG DOLLY—receives pigs as they are cast. Price \$50.00

THE "HUTZLER" REMELTING SYSTEMS

34"

**Model H-4****Complete with:****Agitator****Thermostat****Thermometer****Control Light****2 Water-cooled Moulds**

40"

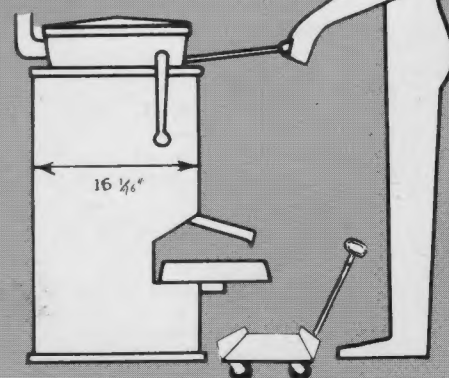

NOTE that only 40 sq. inches of floor space are required for a 1-ton melter. (36 sq. inches are used for the moulds alone on the other makes).

Complete accessibility of tippable water-cooled moulds and movable spout which tucks in under crucible.

"HUTZLER" Remelting Systems are expressly designed for simple hygienic and fast repigging. Back-breaking labors and bad odors so often associated with antiquated melters, are completely eliminated.

DON'T WAIT!!! cut mats as needed and SAVE!

Why wait for months to have matrices cut at the factory?

Why use the antiquated and tedious methods of cutting with file or saw?

YOU can mill your mats exactly to size, in half the time and effort. The "HUTZLER" MAT MILLER mills

—Lugs—Combinations—Mixer and Font Notch

WOW!!
AND WE HAVE TO
CUT THE LUGS TOO?

WHY STRUGGLE
WHEN WE COULD
GET A MACHINE?

BOY! IT'S ROUGH
CUTTING THESE
NOTCHES EXACT!

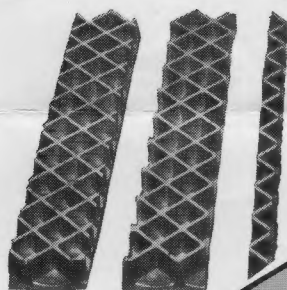

No need to scuff and scratch your knuckles. Use the "Hutzler" Mat Miller for that exacting and standing rush job.

Pulley for motor hook-up is attached. Price \$145.00

Spare blades in stock. Large \$4.50; small \$3.50.

NOW! "ALUMA-BASE" — THE ULTIMATE IN NEWSPAPER BASE

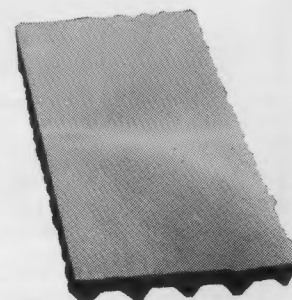

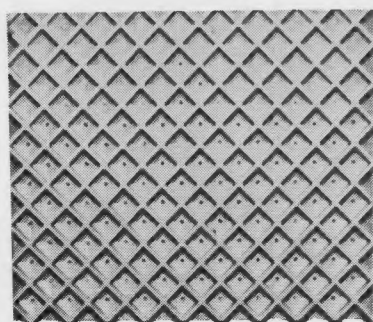

"HUTZLER"

This amazing new "ALUMA-BASE" has these important advantages:

- Eliminates warping or swelling
- Reduces make-ready time to almost zero
- Holds tolerances to $\pm .001$ "
- Withstands extreme pressure (4,000 psi)
- Is easily cut by composing room saws
- Is lightweight and easily handled

Sizes are $9\frac{1}{2}$ " x 11" and assorted heights are available to bring type up to .918" \$8.90 each

Less expensive than Magnesium or Plastic — Costs less than 9¢ per sq. inch. You Can Cut It. You Can Wax It. You Can't Warp It. You Can't Distort It.

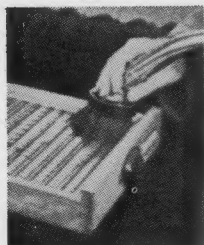

"Aluma"-Base, while extra light in weight, is not injured by tight lock-up and stereotype mat rolling; does not warp or distort under high molding temperatures; is extremely rugged and is designed for years of daily usage.

HUTZLER'S VACUUM CLEANERS

TYPENGREIF

The heavy-duty vacuum cleaner for all work — a **must** accessory for any printing plant. Has 3-speed motor to assure proper power from delicate camera parts to coarse type metal shavings . . . wheels to roll quickly and easily anywhere in plants . . . an assortment of attachments specially designed for each cleaning job.

#102 Soft Type Brush \$3.50

#101 Typecase Nozzle \$19.50

\$125.
Includes cable
& flexible hose.

ALSO HELPS CONTROL POISONOUS LEAD IN THE PLANT

. . . the dust that can be a constant source of irritation and danger to allergy sufferers and those with other conditions aggravated by lead dust.

TYPENGREIF ATTACHMENTS

- ☐ General Cleaning Set consisting of 2 metal wands 20" long ea., oval suction brush, jointed elbow, felt bumper, small upholstery nozzle \$19.80

- ☐ Vacuum polisher #19 12.00

- ☐ Vacuum broom #18 15.50

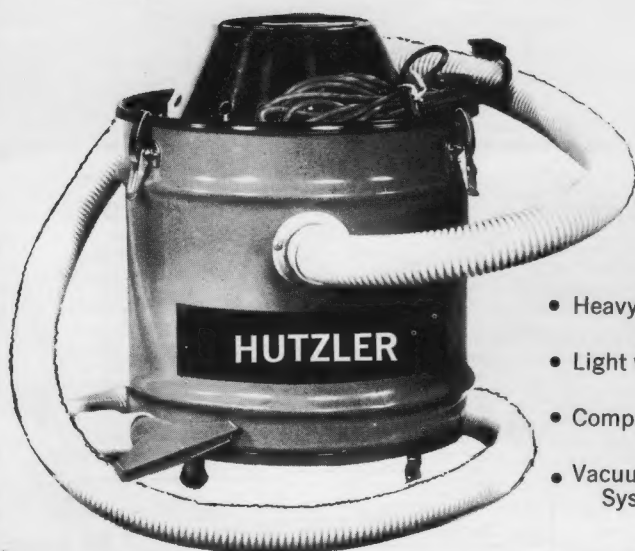

- ☐ Air heating Unit #21 — perfect for drying out motors, electrical wiring, inks, paints, etc.; also used to warm up rubber rollers in cold weather 10.00

- ☐ Matrix Magazine Nozzle #17, 3' long 22.50
Brush #17a is changeable. No liquid cleaner is needed. 2.50

Parts No. 18 and 19 can be used only in connection with the General Cleaning Set.

Not Shown: No. 103 Soft Dusting Brush 7.90
No. 104 Crevice Cleaning Tool 2.00

POWER BOY

- Heavy Duty
- Light weight
- Compact
- Vacuum Blower System

- Steel Cylinder
- Large Capacity
- Ball Bearing Motor (sealed in lifetime lubricant)
- Double filter
- Caster Dolly

The "HUTZLER" POWER BOY has been designed to meet the vigorous requirements of heavy duty commercial cleaning. Powerful, reliable and easily maneuverable, providing the utmost in stability and mobility.

Excellent for picking up type metal around composing machines; gum sprays, dirt and grime in hard-to-get places in presses, fixtures and the like.

\$79.50 complete with 6 ft. 1-1/2" hose and cleaning tool

Chrome metal curved hose end - 2 extension wands - metal floor tool with brush - round brush - crevice tool - upholstery tool - \$10.50

All "Hutzler" Vacuum Blower Systems are guaranteed for one year.

PLUNGER WIPE

is a liquid blending of newly developed chemicals that act as a high temperature lubricant plus a retardant against corrosion.

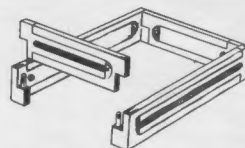

Plunger corrosion is a rapid process, causing the rings to be eaten away, thus losing compression on the down stroke and therefore do not get a full measure of type metal into the mold cavity.

YOU CAN AVOID THIS!

A quick, daily rub-around with 'PLUNGER WIPE' will keep plunger as good as new for a long, long time. It rapidly pays for itself in preventing replacement and down time and at the same time giving a more perfect slug.

Remember, "PLUNGER WIPE" will not only lubricate, but also inhibit corrosion.

HUTZLER

MONOLUBE

Extensive tests proved "Monolube" to be superior

- for lubricating nozzles of Monotype, Ludlow and all types of casting machines.
- for Lubricating plungers of Monotype, Intertype, Linotype and all composing machines.
- for lubricating throats of Linotype, Intertype and all linecasting machines.

These tests further prove that "Monolube" retains for longer periods the non-sticking of plungers and retardation of oxide accumulation on plunger and wells, assuring smooth and easy operation and resulting in solid lines and type with a sharp face.

"Monolube" is supplied in a tin-alloy casing, which fuses with lubricant and aids in strengthening metal baths.

Box of 12 sticks \$9.60

THE "JUMBO"

DIAL THERMOMETER

gives:

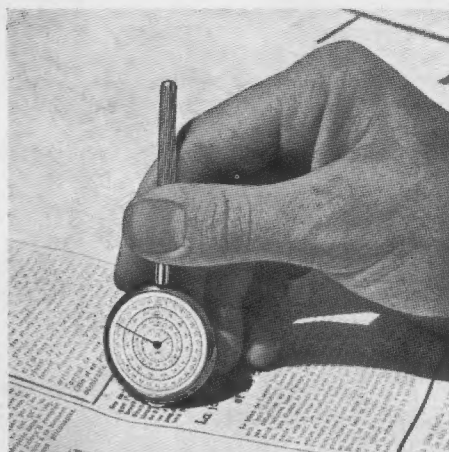

- instantaneous temperature readings—no delays, no waiting.
- precise maintenance of casting temperature.
- controlled metal temperature.
- a counter check on thermostats.
- reliable check of metal pots, Linotype, Stereotype, Ludlow Strip Casters, etc.

Hutzler's "Jumbo" dial thermometer is easy to read, with heat ranging from 32° to 930° F; it is highly efficient and accurate, expressly designed for easier reading and accuracy.

Only \$9.50 each

GRAPHIMETER "CEPAG"

it helps to facilitate the work of all administrative commercial and technical departments of the graphic industry.

it **calibrates** for each measuring operation simultaneously (addition and subtraction) in an unlimited way the pica and corresponding number of lines in type sizes 6 to 12 point.

it **fixes** the length of sides—the area to be covered by text—the spaces in justification work.

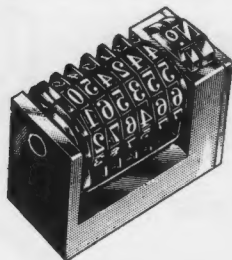

"CEPAG" is exact—saves time—is modern—is a product of the Swiss Watch Industry. Patent #49853.

Price \$18.50

PRO SAN

THE PROTECTIVE HAND CREAM THE INVISIBLE BARRIER CREAM

PRO-SAN forms an invisible barrier, which provides protection against many irritants and allergenic agents encountered in the graphic arts. It goes on fast; is not sticky or greasy; can't hinder grip or dexterity; consistent over wide temperature ranges; is easily removed after exposure to contaminating agent. "Pro-San" provides necessary protection without interference to the normal function of skin glands.

PRO-SAN 101—Protects against surface contamination such as oils, dirt, grime, grease and the like.

PRO-SAN 102—A water soluble barrier, which protects against contamination by water insoluble materials, such as carbon tetrachloride, chlorinated solvents and the like.

PRO-SAN 103—A water resistant vanishing cream, to protect the surface against contamination by dilute acids and alkalis, such as coal tar derivations, dye solutions, etc.

PRO-SAN 104—affords excellent protection against photosensitizing, infra violet rays, etc.

PRO-SAN —Reduces skin hazards
Reduces absenteeism and insurance claims due to skin disorders
Improves moral.

Available in 16 oz. Jars only

PRINTING AIDS BY HUTZLER

Introducing six types of Aerosol Containers to save considerable time on machine stoppage.

ANTI-RISING-SPACES — prevents work-up when sprayed on open form. Holds form tightly—Lino-Mono-Ludlow-Plates-furniture. Easily removed after form has been printed.

ANTI-STATIC — prevents static electricity caused by friction, when sprayed on all parts of press, which are in contact with paper.

ANTI-DRIER — Prevents ink drying during machine stoppage, when sprayed on rollers. Also prevents skin formation on open ink cans.

ACTIVATOR — activates and regenerates ink viscosity when sprayed on rollers, allowing immediate running after lengthy machine stoppage.

SEPARATOR — anti-adhesive and separating medium, effectively prevents the adherence and accumulation of inks to metal parts of printing and punching machines, tapes, etc. Excellent for stereotyping.

REGENERATOR — used same as ACTIVATOR, but is specially formulated for screen printing inks.

Price \$24.00 per doz.

NOW...WE CAN SUCCESSFULLY DE-HAIRLINE MATS

Since 1895 printers have been plagued by hairlines
They've searched and searched for a cure . .
a method that wouldn't damage the mats.
Most of them gave up. We didn't.

Now you can have your Mats De-Hairlined and returned to you in original size with sidewalls as good as or better than new!

WE DO NOT SHAVE MATS. Your mats will be like new, and are guaranteed to wear like new under comparable conditions. Complete fonts of any size require 10 days. We can only guarantee if we do complete fonts.
